

I take this opportunity to thank everyone in TH family. I am very glad to be one of blessed managers. It was always my prayer but now I thank God for the answer.

I would like to share with you all my biography, so that you can know me and I know you as well, so that we can work as team in one family towards the positive change of refugees in Africa and world at large.

I called BAGISHA JOHN, born on 6th December, 1986 in Congo Bunagana, North Kivu. I was born in the family of 7 members where two died and 5 remained and i one of who are still alive.

I reached in Uganda in 1997, due to war which broke in Congo in 1996 Nov 25th. We were received in Kisoro District in Uganda and after 6 month we were brought to Kyangwali.

As we reached in Kyangwali, life was not easy; I was being cared by an old woman whom Beth today knows better, because she visited her once when she was to Kyangwali.

Life was not supporting me, during this early time. I faced various challenges which i can't repeat now but only God himself can witness very well than me or anyone else.

I failed to stay with this old woman because of Education situation. I would need fees when she could need food, this could be a big challenges, then later I left her, I went to get care to another family where i could at list be in school while I am working for fees. This life continued up to now am still in it but i am happy because of COBURWAS which is showing me good direction with skills of Leadership and entrepreneurship.

Since before I knew that it's through education that my live and my community will come to understand the world.

I love staying with others because knowledge in shared not by one but by many. Many of my problems were solved in group and that why i should stay in group.

I am in S 6 at Morning Star Christian High School in Hoima. I serve in school as Information Prefect. I am doing well.

I am very ready to work with others in TH since my dream is true and thank you for allowing to be one of you people.

I love so much change, because it is through change that development comes.

I hope we shall keep in touch and if there is any questions please come on am ready to answer as well.

New born of TH, wishing long live TH, Mama Africa, Board of Directors and all African Managers.

Truly BAGISHA JOHN.
