# Think Humanity

*"a positive change for refugees in Africa"*

Think Humanity was created to provide relief, support and hope for a promising future to refugees in Africa.

**World Malaria Day represents a chance for all of us to make a difference.**

This World Malaria Day (April 25) these refugee children will sleep safely because of bed nets, which can protect them from this deadly but preventable disease. Thank you donors!

Since December 2007 Think Humanity has provided more than 10,000 bed nets to refugees in Africa.

**This is your chance to make a difference in the fight against malaria  
\$5 will provide one net, protecting up to 4 children for the next 3-5 years.  
(\$5 includes the insecticide-treated net, transporting and distribution of nets, teaching usage and follow-up)**

## Malaria Facts and Figures

- A child under the age of five dies from malaria every 30 seconds in sub-Saharan Africa.
- Malaria kills more than one million people per year; 91 percent of those who die are children in Africa.
- Malaria continues to be the leading cause of death among refugees.
- Untreated, malaria can lead to severe anemia, organ damage, convulsions, coma and death.
- In Africa, 25 million pregnant women and their newborns are exposed to anemia, low birthrate and die due to malaria.

Together we can help eliminate the suffering, death and economic burden caused by malaria. [Visit the website to see how you can help.](#)

One of the main strengths of our nonprofit is that nearly 100% goes directly into our projects and that you can clearly see the results of your donation. We operate directly on the ground with volunteers in Africa. This is a model that is built on dedication, compassion, hard work and a vision that anyone can make a difference!
